Portfolio: www.jolaandco.com

PROFESSIONAL SUMMARY

Senior Business Analyst & Business Intelligence Specialist with 20+ years in operations and 5+ years driving digital transformation in enterprise environments. Expert in gathering complex business requirements, designing scalable solutions, and translating stakeholder needs into clear specifications—equally comfortable in requirements analysis, business process optimization, data analytics, and stakeholder facilitation. Built enterprise BI infrastructure from scratch at two organizations, designed and delivered end-to-end reporting solutions across Azure Databricks and Power BI, and led cross-functional requirements workshops across 8+ countries. AgilePM-certified, PL-300 certified, proficient in Power Platform (Power BI, Power Query, Power Automate), Microsoft 365, SQL, and process modelling. Available for remote EMEA delivery.

KEY STRENGTHS

Enterprise BA expertise: Gathered requirements from 8+ countries, designed end-to-end business processes, facilitated workshops with Board members and C-level stakeholders, and translated divergent needs into clear, documented, implementable solutions. Proven ability to navigate complexity and build consensus in multi-stakeholder environments.

Business intelligence & analytics: Owned the full BI stack across two organizations—data engineering, SQL transformation pipelines, semantic modeling, DAX, Power Query, and interactive dashboard design. PL-300 certified; experienced with Azure Databricks, Power BI DirectQuery, and large multi-source dataset integration.

Process optimization & documentation: Deep experience designing and documenting business processes, creating functional specifications, writing effective user stories, and supporting UAT and validation activities—core to both BA projects and ERP implementation.

Microsoft ecosystem depth: Hands-on with Power BI, Power Query (M), Power Automate, DAX, SQL, Business Central, Sitetracker, SharePoint, and Microsoft 365—comfortable learning new Microsoft platforms quickly.

Agile delivery & stakeholder alignment: AgilePM-certified; experienced in iterative delivery, requirements translation, cross-functional team leadership, and communicating complex technical topics to non-technical audiences.

EXPERIENCE

Business Development Coordinator — BI & Strategy | E.ON Drive Infrastructure, Central Team · Remote *Dec 2025 – May 2026*

- Owned the full rebuild of a 10-country EV Utilization Model: replaced a fragile, hardcoded Excel system with a dynamic SQL transformation layer on Azure Databricks, star-schema architecture, scenario selectors, and automated data integrity checks.
- Designed and deployed Power BI DirectQuery integration on Azure Databricks—eliminating manual refresh cycles, improving report performance, and enabling live cross-country analytics for senior leadership.
- Architected a pan-European Competitor Intelligence pipeline: integrating REST APIs and public datasets across 10 markets into a unified analytical framework with full metric definition and documentation.
- Led requirements sessions with commercial stakeholders across 8+ countries; translated ambiguous business questions into measurable KPIs, scoring logic, and benchmark frameworks—delivered iteratively in an Agile cadence

Tech: Azure Databricks · Power BI · MS SQL · Python · DAX · Power Query (M) · REST APIs

Commercial Analyst — Business Operations & BI | E.ON Drive Infrastructure, Italian Team · Remote *May 2025 – Dec 2025*

- Built a geospatial analytics model in Databricks + Power BI evaluating 890+ potential EV sites—dynamic filtering, multi-dimensional scoring, and coverage gap analysis feeding location strategy for senior leadership.
- Designed data integration logic between Procurement (Business Central), Finance, and project management systems (Sitetracker)—resolving multi-system data integrity issues and restoring financial transparency.
- Delivered recurring performance dashboards with reconciled actuals vs. budget variance; maintained calculation documentation and performed regular data validation checks.

Tech: Power BI · Azure Databricks · MS SQL · DAX · Business Central · Sitetracker

Deployment Coordinator — Enterprise Operations

E.ON Drive Infrastructure, UK Team · Remote | Jun 2024 – May 2025

- Coordinated 50+ concurrent enterprise projects across Engineering, Procurement, Finance, and Operations; standardized workflows, eliminated bottlenecks, maintained 100% on-time delivery of critical milestones.
- Developed tracking frameworks and reporting dashboards enhancing visibility across deployment lifecycle; supported real-time decision-making and issue resolution by stakeholders.
- Created detailed process documentation and workflow diagrams; ensured consistency, compliance, knowledge transfer, and stakeholder understanding across distributed teams.

Tech: *Process Documentation · Stakeholder Management · Project Coordination · Requirements Gathering · SharePoint*

Project Coordinator — Business Intelligence & Reporting | SWARCO Smart Charging · Remote *Oct 2022 – Jun 2023*

- Sole BI owner: end-to-end responsibility for the full reporting stack — MS SQL extraction, data transformation, semantic modelling, DAX measures, and Power BI dashboards used in weekly leadership reviews.
- Built and optimised DAX and Power Query (M) transformation workflows tracking real-time KPIs, cost drivers, and project performance — replacing manual Excel processes across Operations and Finance.
- Maintained full metric definition documentation; cross-trained stakeholders on dashboard usage to drive adoption across non-technical teams.

Tech: *Power BI · MS SQL · Power Query (M) · DAX · Excel*

Network Support / Data Coordinator | SWARCO Smart Charging · Remote

Mar 2020 – Oct 2022

- Co-built the EV Investment Department's data infrastructure from zero: data systems, SQL reporting pipelines, and investment analysis models.
- Presented data-driven revenue and investment analysis directly to the Board — distilling complex multi-source datasets into clear visual narratives influencing strategic market entry decisions.
- Automated recurring reporting pipelines, significantly reducing manual workload and improving data accuracy.

TECHNICAL SKILLS

Power BI & Visualisation: Power BI (PL-300 Certified) · DAX · Power Query (M) · Report optimisation · Data storytelling · Tableau

SQL & Data Engineering: MS SQL (MySQL, SQL Server) · Query optimisation · Star-schema modelling · ETL pipelines · Azure Databricks (SQL / Delta Lake) · REST API integration

Platforms & Tools: Azure · Business Central · Sitracker · SharePoint · Power Automate · Microsoft 365 · Python · Excel

Languages & Delivery: Polish (native) · English (fluent) · Italian (A2) · Stakeholder requirements translation · Autonomous delivery · Cross-functional team collaboration

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

PL-300 Power BI Data Analyst Associate — Microsoft Certified, 2022

AgilePM® v3 Foundation & Practitioner — APMG International, 2025

Generative AI Mastermind — Outskill, 2025 (applied AI in data workflows, automation, and summarisation)

SQL Masterclass 2024 · SQL for Data Analytics & BI · SSIS Part 1 — Udemy

EDUCATION

Bachelor's Degree in Business and Service Industry Management · WSHiG, Poznań, Poland · Oct 2000 – Jun 2003

Portfolio & case studies: www.jolaandco.com · Remote · EU / Poland · Available immediately (B2B)
